

Formation, enforcement activity and material custody

Original individuals retain their cohort after entry or exit · secure custody and truthful paid audits are supplied capabilities

A–C: four seed values, means and observed ranges per cell; no confidence intervals. M gives mean successful monitor purchases. Unmonitored activity is retained in the tables.

D: equally weighted mean across all 32 episodes per arm; cells reuse the four seeds. Custody is book ownership, not redeemed consumption; no terminal liquidation occurs.
